

RELY ON EXCELLENCE

BuraTAL-Flex 6224

Packings & Gaskets | Packing for valves

Features

BuraTAL-flex 6224 is a diagonal braided packing made from a combination of Aramid and PTFE yarns with special impregnation. 6224 is the preferred choice for valves, especially low emission applications.

Advantages

- Low leakage rates
- Emission certificate
- Good pressure and extrusion resistance
- Low friction
- Suitable for quick repair service

Operating range

Pressure: $p = 300 \text{ bar}$

Sliding velocity: $vg = 2 \text{ m/s}$

Temperature

- $t = -100 \text{ °C} \dots +280 \text{ °C}$

Chemical resistance:

pH = 0 ... 14

Density: 1.6 g/cm^3

Standards and approvals

- TA-Luft
- ISO 15848

Recommended applications

- Process industry
- Petrochemical industry
- Chemical industry
- Refineries
